

# Contents

Series editor foreword . . . . .	v	Biological derivatives of amino acids . . . . .	77
Prefaces . . . . .	vii	Nitrogen balance . . . . .	78
Acknowledgements . . . . .	ix	Amino acid catabolism . . . . .	78
<b>1. Introduction to metabolism . . . . .</b>	<b>1</b>	The urea cycle . . . . .	80
Introductory concepts . . . . .	1	Protein synthesis and degradation . . . . .	82
Pathway regulation . . . . .	3		
Redox reactions . . . . .	7	<b>7. Purines, pyrimidines and haem . . . . .</b>	<b>87</b>
Key players . . . . .	8	One-carbon pool . . . . .	87
<b>2. Energy metabolism I: The TCA cycle . . . . .</b>	<b>13</b>	Purine metabolism . . . . .	88
The tricarboxylic acid (TCA) cycle . . . . .	13	Pyrimidine metabolism . . . . .	95
		Haem metabolism . . . . .	99
<b>3. Energy metabolism II: ATP generation . . . . .</b>	<b>17</b>	<b>8. Glucose homeostasis . . . . .</b>	<b>107</b>
ATP generation . . . . .	17	The states of glucose homeostasis . . . . .	107
Substrate-level phosphorylation . . . . .	17	Hormonal control of glucose homeostasis . . . . .	111
Oxidative phosphorylation . . . . .	17	Glucose homeostasis in exercise . . . . .	112
		Diabetes mellitus . . . . .	112
<b>4. Carbohydrate metabolism . . . . .</b>	<b>23</b>	<b>9. Digestion, malnutrition and obesity . . . . .</b>	<b>121</b>
Carbohydrates: A definition . . . . .	23	Basic principles of human nutrition . . . . .	121
Glycolysis . . . . .	25	Energy balance . . . . .	123
The pyruvate → acetyl CoA reaction . . . . .	30	Proteins and nutrition . . . . .	128
Gluconeogenesis . . . . .	31		
Glycogen metabolism . . . . .	33	<b>10. Nutrition: Vitamins and vitamin</b>	
The pentose phosphate pathway (PPP) . . . . .	37	<b>deficiencies . . . . .</b>	<b>133</b>
Fructose, Galactose, Sorbitol and Ethanol . . . . .	40	Vitamins . . . . .	133
		Fat-soluble vitamins . . . . .	133
<b>5. Lipid transport and metabolism . . . . .</b>	<b>45</b>	Water-soluble vitamins . . . . .	137
Lipids: An introduction . . . . .	45		
Fatty acid biosynthesis . . . . .	48	<b>11. Nutrition: Minerals and trace elements . . . . .</b>	<b>149</b>
Lipid catabolism . . . . .	53	Classification of minerals . . . . .	149
Cholesterol metabolism . . . . .	59	Calcium . . . . .	149
Lipid transport . . . . .	62	Phosphorus . . . . .	151
Ketones and ketogenesis . . . . .	67	Magnesium . . . . .	152
		Sodium, potassium and chloride . . . . .	152
<b>6. Protein metabolism . . . . .</b>	<b>71</b>	Sulphur . . . . .	152
Protein structure . . . . .	71	Iron . . . . .	153
Amino acids . . . . .	71	Zinc . . . . .	157
Key reactions in amino acid metabolism . . . . .	71	Copper . . . . .	157
Amino acid synthesis . . . . .	75		

Iodine . . . . .	158	Physical examination . . . . .	170
Other trace elements . . . . .	160	Further investigations . . . . .	179
Symptoms of mineral deficiencies . . . . .	160	Routine investigations . . . . .	179
		Assessment of nutritional status . . . . .	186
<b>12. Clinical assessment of metabolic and nutritional disorders . . . . .</b>	<b>163</b>	<b>Best-of-five questions (BOFs) . . . . .</b>	<b>191</b>
Presentation of metabolic and nutritional disorders . . . . .	163	<b>Extended-matching questions (EMQs) . . . . .</b>	<b>201</b>
Common presenting complaints . . . . .	163	<b>BOF answers . . . . .</b>	<b>205</b>
History taking . . . . .	166	<b>EMQ answers . . . . .</b>	<b>209</b>
Things to remember when taking a history . . . . .	166	<b>Glossary . . . . .</b>	<b>213</b>
Communication skills . . . . .	168	<b>References . . . . .</b>	<b>217</b>
		<b>Index . . . . .</b>	<b>219</b>
