arthroscopy, shoulder debridement																																
arthroscopic repair meniscus																																
Arthotomy with DB																																
arthroscopy wrist																																
arthroscopy debridement ankle																																
AC repair with fixation																																
wide excision mass																																
Total shoulder arthroplasty																																
extended curettage with PMMA with bone graft																																
manipulate shoulder																																
canulated screw SCFE																																
varus derotation osteotomy with plate																																
Change cast under fluoroscopy																																
Revise Ilizarov																																
remove ATB cement and external fixation																																
closed reduction with tibial nail																																
closed reduction with cast																																
closed reduction with multiple screw femur																																
closed reduction with ext. fixator																																
closed reduction with K-wire fixation																																
Lengthening lower extremities																																
Corrective osteotomy Radius with Iliac bone graft																																
Arthotomy and debridgement of the Hip joint & remove ATB cement																																
corrective osteotomy																																
corrective osteotomy malunion fracture DER.																																
Corrective osteotomy with K-wire fixation																																
Wedge osteotomy with staple																																
wedge osteotomy with plate and screw																																
Salter' osteotomy with hip spica cast
